To whom it may concern,

Air Excel is operating in Tanzania for the past 16 years with daily scheduled and charter flights domestic and regional.

We have been operating under Enoyaone's Online Booking Solution.

We have found their solution to best fit our airline needs. Enoyaone's solution has proven its reliability and stability throughout our usage, allowing us to expand by giving us the option to better manage our customers and agents data and bookings.

As we selected the full solution from Enoyaone, we also got a full website which gave us online presence with an innovative and well designed website.

We find Enoyaone support to be responsive and well addressed.

We strongly recommend Enoyaone's solution to any airline.

ENOYAONE RESERVATION SYSTEM

This is to confirm that Safarilink has been using the Enoyaone reservation system since 2009. We have found the system is able to cope with our unique type of operations such as flights to Masai Mara, which service up to 8 different airstrips (same as saying airports!) in one destination.

Our operations involve flights to all the major game parks in Kenya and major cities on the Kenyan Coast, so we do not have a simple network of flights from point A to B, but a more complex network of inter-connecting flights catering for the tourist, leisure and business markets.

The developers have been very proactive and co-operative when we have requested modifications to the system to suit our specific needs.

I would highly recommend any low cost carrier that is looking for an affordable system to view the Enoyaone system before committing to other more expensive systems available in Europe.

Please feel free to contact me for any additional information.

Yours sincerely,
Anu Vohora

ENOYAONE RESERVATION SYSTEM

This to confirm that Overland Airways Ltd. commenced use of the Enoyaone reservation (aeroCRS) system since November 2017.

The system serves our purpose and we have found it suitable for the needs of the Nigerian market.

The support team has been prompt and helpful in resolving issues and providing solutions for modifications unique to us and required for our operations.

I would recommend any Airline looking for an affordable yet robust enough reservation system to consider using Enoyaone reservation system.

Thank you.

Yours faithfully
for: **OVERLAND AIRWAYS LTD.**
